Workshop On Electronics, Interfacing with Microcontroller

Date:11/01/2023

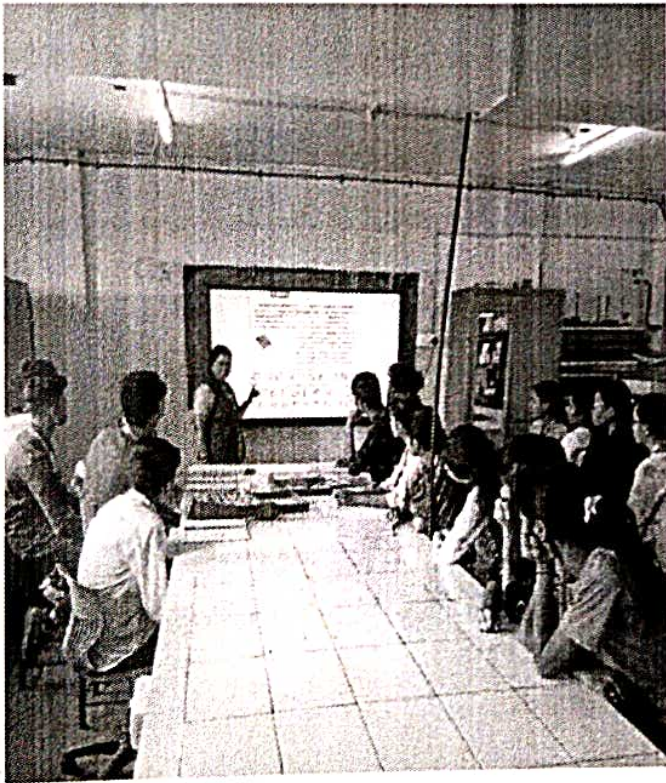

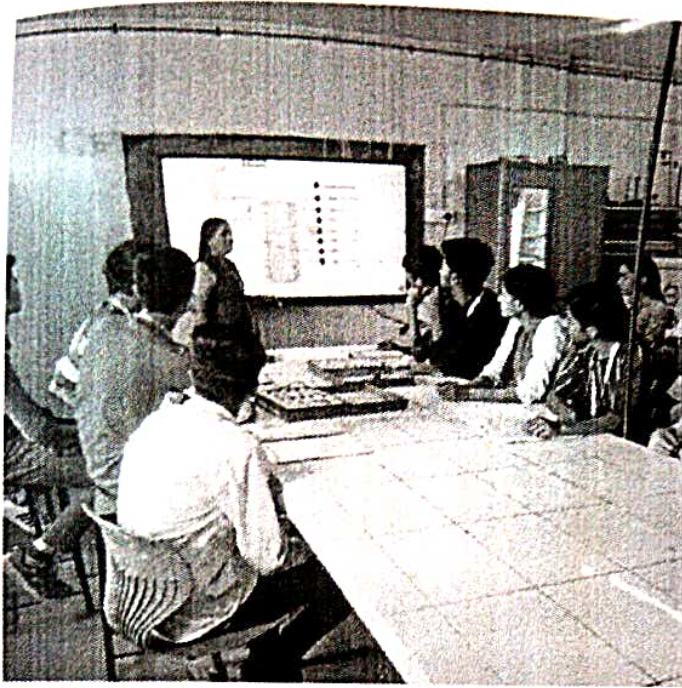

SNBP College, Yerwada organized a workshop on the topic "Electronics, Interfacing with Microcontroller" for the students of class SY, TY BSc(CS). The workshop was taken by Ms. Sunanda Phadtare.

The main objective of the workshop was to enable participants to know about interfacing of microcontroller with seven segment display. In the first session of the workshop, she explained for a common anode display, we need to connect the common anode pin to Vcc and the segment pins to the output pins of the 8051. Once the display is connected to the microcontroller, we can write a program to control the display. We can use the P1 port of the 8051 to connect to the segment pins of the display.

In the second session of the workshop, she given the demonstration and performed practical on above subject.

WORKSHOP ON ELECTRONICS

Date:03/02/2023

SNBP College, Yerwada organized a workshop on the topic "Electronics" for the students of class FY BSc(CS). The resource person for this workshop was a Ms Sunanda Phadtare.

The main objective of the workshop was to enable participants to know about the basic elements of electronic circuits and to build simple circuits using electronic components.

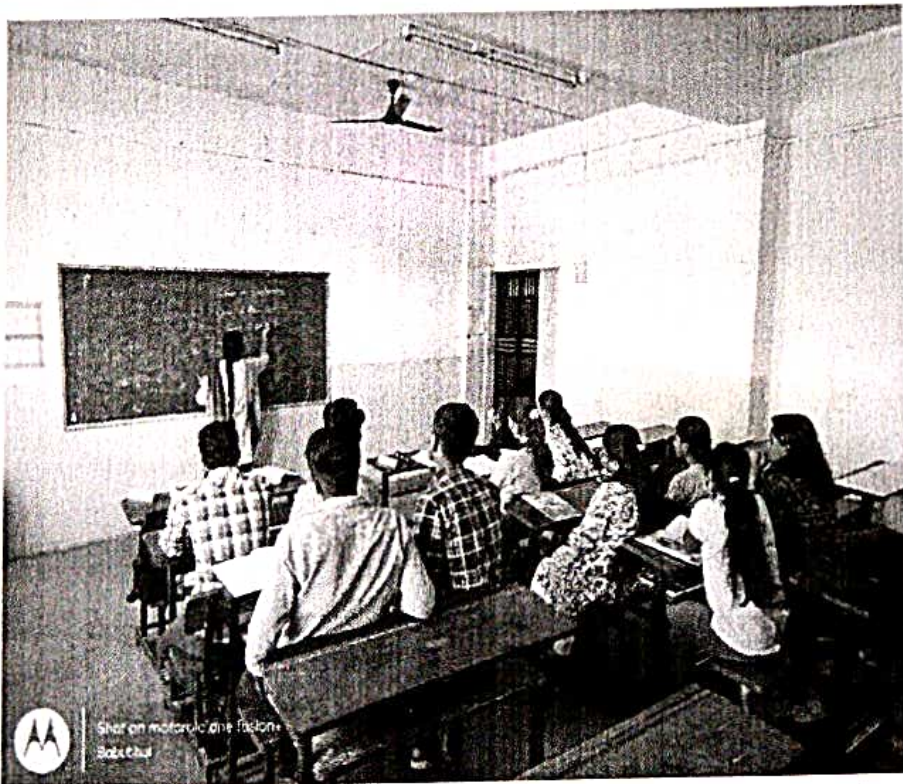

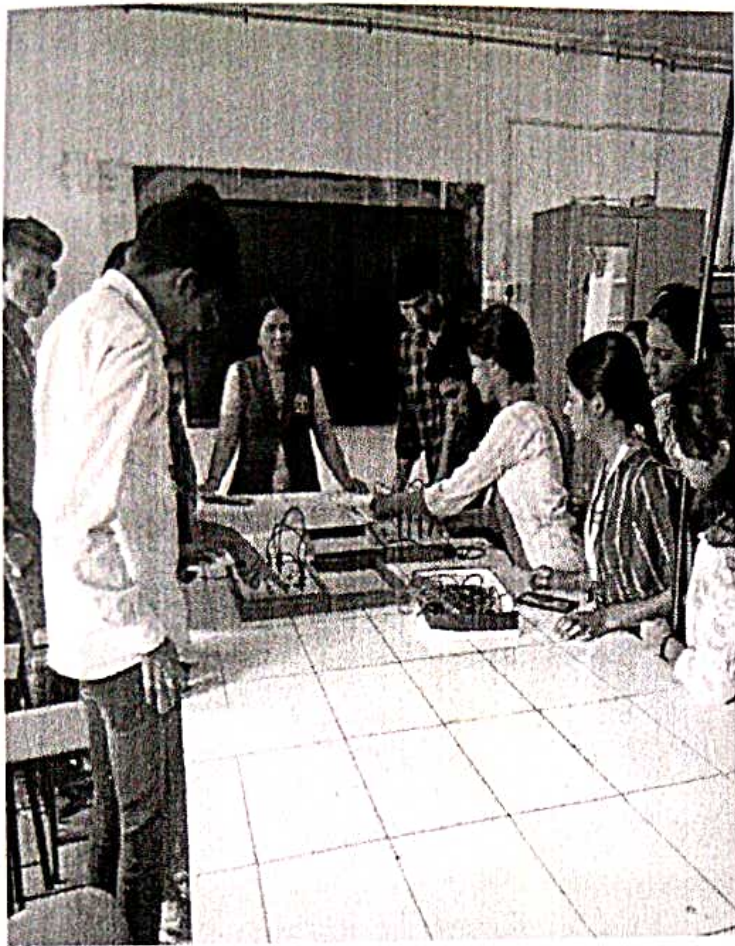

In the first session of the workshop, the basics of Electronics, Electrical tools essential to build electronic circuits, safety measures to be followed and symbols used to illustrate electronic components, types of circuits, working of a switch was explained. Workshop mainly focused on rigging of circuits using LED, resistors, switch, battery using breadboard. Participants were able to identify different values of resistors by understanding the colour codes of the resistors.

Second session was focused on explaining the colour codes of the resistor and Third Session was focused on hands-on Sessions. Initially participants were asked to draw the simple circuit in the paper using pencil to ensure the current flows through the graphite and attach LED to one end of the circuit and to attach a battery on another end to glow the LED. To make the participants familiar with the uses of a breadboard and its different parts, a simple circuit was built using one LED, a resistor and a battery.

On successful completion of this workshop the participants were able to understand the basics elements of electronic circuits and to assemble simple circuits using electronic components.
